

Using the EMR Simulations

Step 1

Download the Simulations from Skills Commons:

- OpenEMR: <https://www.skillscommons.org/handle/taaccct/2254>
- Vista: <https://www.skillscommons.org/handle/taaccct/2233>

Step 2

Locate the downloaded archive and unzip it.

- Windows: Right click the archive and select “Extract All” and press “Next” on the resulting dialog box. This will unzip the files.
- OS X: Double clicking the archive will unzip it.

Step 3

Hosting on a Web Server (Recommended)

Upload the full contents of the folder onto your web server and direct the end user to the **launch.html** file to begin the simulation.

Opening Locally

In the resulting folder, locate **launch.html** and open it in your web browser of choice.
