

# Exercise: Building a Simple User Interface

---

In this exercise, you will create an XML layout that contains a text field and a button.

1. Browse to <http://developer.android.com/training/basics/firstapp/building-ui.html>
2. Scroll down and complete Steps 1-6 to create a Linear Layout.
3. Complete the three steps listed to add a text field.
4. Complete the four steps to add string resources.
5. To add a button, complete the four steps listed.
6. Make the input box fill the screen width by completing the next two steps.
7. Run the app.

Submit the following for grading:

- The XML layout file
  - The strings.xml file
  - A screen shot of the running app
-
