Development was funded by the Department of Labor (DOL) Trade Adjustment Assistance Community College and Career Training (TAACCCT) Grant No. TC-22525-11-60-A-48; The National Information Security, Geospatial Technologies Consortium (NISGTC) is an entity of Collin College of Texas, Bellevue College of Washington, Bunker Hill Community College of Massachusetts, Del Mar College of Texas, Moraine Valley Community College of Illinois, Rio Salado College of Arizona, and Salt Lake Community College of Utah.

This workforce solution was funded by a grant awarded by the U.S. Department of Labor's Employment and Training Administration. The solution was created by the grantee and does not necessarily reflect the official position of the U.S. Department of Labor. The Department of Labor makes no guarantees, warranties or assurances of any kind, express or implied, with respect to such information, including any information on linked sites, and including, but not limited to accuracy of the information or its completeness, timeliness, usefulness, adequacy, continued availability or ownership.

# HTML Editing Tutorial

---

This tutorial will show you how to incorporate graphics into your WordPress site. Follow the instructions to complete Assignment 9f: HTML Editing.

## What is HTML?

**HTML** stands for **H**ypertext **M**arkup **L**anguage. It is a programming language specifically designed for the web.

For some background knowledge and a good overview of HTML editing reading the following:

[HTML](#)

For a more practical experience, Austin Community College has an excellent tutorial on HTML. You can access this either as a PDF file or you can go to their workshop website. Work through whichever one serves you best – their format is slightly different:

While the programming of HTML is beyond the scope of our class, we can prepare your website to allow HTML programming in the future. To do so you will install and activate one of the HTML Plugins.

1. Go to the following link:

[Plug & Edit HTML Editor](#)

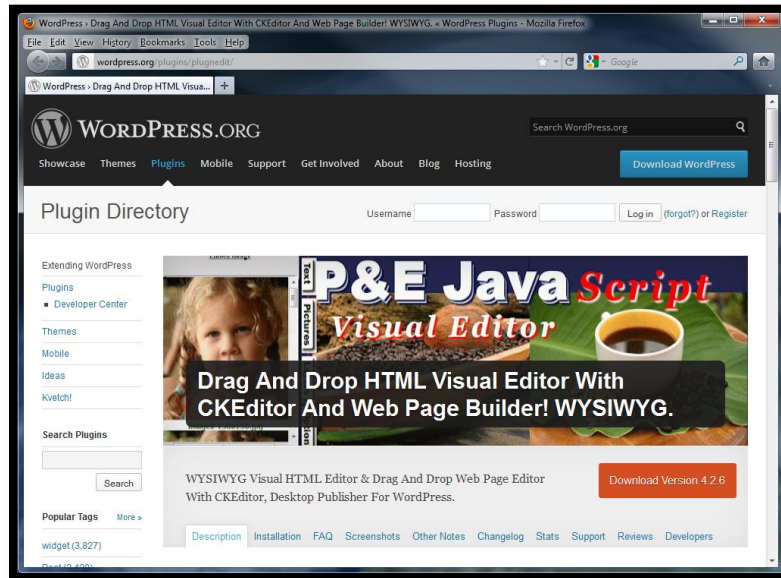

Figure 2 [WordPress](#)

- Download the software – from the **Plugin Directory**
- Upload the software – to your website
- Activate the **Plugin**

2. For practice (not to turn in):

Try applying what you learned in **HTML Basics** using the **Plug & Edit HTML Editor**.

**Turn in:**

- A screen print of your **Plugin screen**.
- Write a 1-2 page paper based on your reading of the *Austin Community College HTML Basics* describing what HTML is used for and your impressions of HTML programming.
